### Other Tools & Practices

- SEO Optimization
- Performance Optimization
- ChatGPT (as a development accelerator)

## EDUCATION

2016 - 2018

SKRS INTER COLLEGE

High School

2018 - 2021

Raja Jait Singh Govt Polytechnic Hararyana  
Mechanical Engineer

## WORK EXPERIENCE

### Aftersole

April-2025 - Present

ECOMMERCE - NEXT JS

Website: [www.aftersole.com](http://www.aftersole.com) | Own Project.

Location: New Delhi

- Developed a **responsive web application** using Next.js and TailwindCSS
- Managed complex global state using **Redux Toolkit**.
- Designed and structured backend data in **MongoDB** for users, products, orders, and reviews.
- Integrated **Socket.IO** for real-time messaging and built a messaging dashboard using **WhatsApp Cloud API**.
- Developed a full-featured **admin panel** for product management, inventory tracking, and homepage content control with complete CRUD functionality.
- Integrated **JWT-based authentication**, securing user access account.
- Deployed the application on **AWS** using **S3** for storage and **EC2** for hosting, with **CloudFront** CDN for optimized image delivery, ensuring scalability and 99%+ uptime.

### Foldyfinds

Feb-2025 - April-2025

Website: [www.foldyfinds.in](http://www.foldyfinds.in) | Own Project.

ECOMMERCE - NEXT JS

Location: New Delhi

- Developed a **responsive web application** using Next.js and TailwindCSS.
- Developed a responsive, accessible web application using **Tailwind CSS**, **Aceternity UI**, and **shadcn/ui**.
- Managed global application state with **Redux Toolkit** for efficient data handling.
- Designed and structured backend data in **MongoDB** for users, products, orders, and reviews.
- Created a full-featured **admin panel** for product management, inventory tracking, and homepage customization with complete CRUD functionality.
- Deployed on **AWS** with **Nginx**, **SSL**, and GoDaddy domain integration for secure and reliable hosting.
- Leveraged **ChatGPT** to accelerate development, refactor code, and improve overall code quality.

### Design Dales

June-2022 - Feb-2025

E-Commerce Platform - React.js to Next.js 13 Migration

Website: [www.byadab.com](http://www.byadab.com)

Location: New Delhi

- Initially built the application on **React.js**, later migrated to **Next.js** with App Router in 2024 for improved performance and scalability.
- Styled UI with **Tailwind CSS** and **shadcn/ui** for a responsive and consistent design system.
- Integrated third-party APIs including DHL, FedEx, NimbusPost, and Razorpay for logistics and payment processing.
- Deployed the application on **AWS**, configured Nginx, enabled SSL, and managed domain routing via GoDaddy DNS.
- Optimized for **SEO**, performance, and long-term maintainability.
- Utilized **ChatGPT** to accelerate development workflows and assist with content creation.
